The effect of security breaches is costing corporations and institutions well over $100 billion a year. Concurrently, the exposure to security threats has never been greater.

Assess and assure...

...with a vulnerability and risk assessment from SSC.

Security concerns within an institution, industrial facility or business are as varied as the enterprises themselves. A comprehensive vulnerability and risk assessment is one of the most cost-effective ways to direct the actions necessary to mitigate these concerns.

SSC's Corporate Intelligence and Investigation Division provides discreet, reliable and highly effective security assessments to corporations and institutions. With over 30 years of experience and highly credentialed specialists, our security assessment will:

- Identify and categorize all security threats that are applicable and credible to your specific environment(s)
- Provide breach scenarios to expose points of current vulnerability within your environment(s)
- Design security and emergency policies that encompass physical elements, technology, policies and procedures for your environment(s)
- Test and practice your security and emergency policies and procedures from an adversarial viewpoint for maximum impact and ultimately provide for maximum security
- Refine with periodic reevaluations

SSC Security Assessment Service works in close partnership with companies to tailor risk mitigation services to their specific environments. Multi-discipline security expertise provides guidance and support on security issues that encompass:

- Workplace
- Internal and external theft and violence
- Counter-terrorism
- Disaster planning
- Executive protection and travel security
- Network Security
